Our DNA

HISTORY

Responsiveness, adaptability and technical expertise are an integral to the DNA of the Brun Group and its subsidiaries.

Our employees undergo regular training and are committed on a daily basis. They contribute to maintaining operational performance while guaranteeing optimum safety.

The Group's added value: technical and environmental expertise aimed at providing support to customers while maintaining driver comfort and safety.

2023

Marine and Chloé Le Roux, his daughters take over the family business handing over the presidency to Lionel Radenne.

Together, they focus on diversifying the company's activities and reducing its carbon footprint.

1954

Daniel Le Roux, Lucien Brun's son-in-law, takes over the company's management and establishes it in Eybens.

At this point in time, the site has around twenty vehicles.

1910

Georges Brun, the company's founder, transports general goods from the Romanche Valley to Vizille station using horse-drawn carriages.

1971

Jean-Yves Le Roux, the founder's great-grandson, heads the Group which is entirely owned by the family.

Under his leadership and thanks to strong external growth, the Group becomes a renowned player in the transport of dangerous goods and speciality products.

1930

Lucien Brun, his son, continues to develop the Group's business with trucks and specialises in hazardous materials.

SUBSIDIARIES

All our subsidiaries are autonomous, but closely linked by their values and expertise – they have even retained their original names.

This was a conscious decision following their takeover in order to maintain their local reputation and identity.

CUSTOMERS

Our long-standing customers play a vital role in Brun Group's success.

We are grateful for the trust they have placed in our services over the years.

These enduring partnerships are a testament to our customers' trust in our transport and logistics services.

Our commitment to the highest standards of safety, reliability and compliance has been the bedrock of these relationships.

FLEET OF VEHICLES

ENGINE FLEET

- EURO 6 tractors
- LNG tractors
- EURO 6, LNG and CNG rigids trucks

SEMI-TRAILER FLEET

Our tanks

- CO₂
- LNG
- Fuel
- Bitumen
- Chemicals (stainless steel and coated)
- LPG

Other

- Containers
- Container carriers
- Skips
- Ampliroll
- Concrete mixers
- Flatbed trucks
- Flatbed trucks with crane
- Oversize load flatbed trucks

SPECIFIC EQUIPMENT

- Metered distribution
- Pump, compressor
- Generator
- Truck-mounted forklifts
- Electric pallet truck

Our tanks and containers can be handled from the ground

TRADES

| Our activities

Road transport

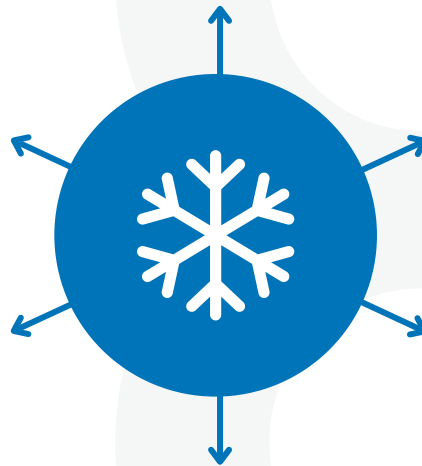

CRYOGENICS

Acceptance and hauling of customer equipment

24/7 service

Owned
cryogenic
packaging

Bulk and
packaged

Argon, Nitrogen,
CO₂, Helium,
Hydrogen,
Oxygen

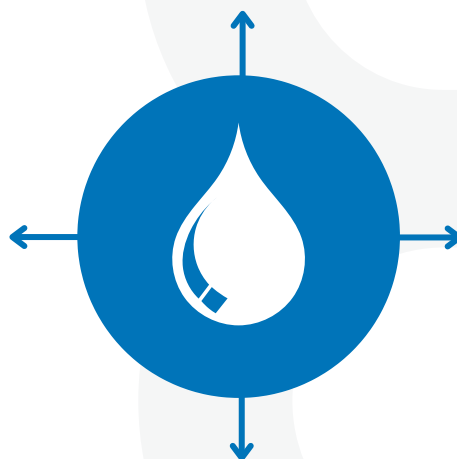

Industrial sites, sensitive sites and health establishments

LNG

Measured distribution at service stations and industrial sites

Bunkering
of ships

Owned
tanks

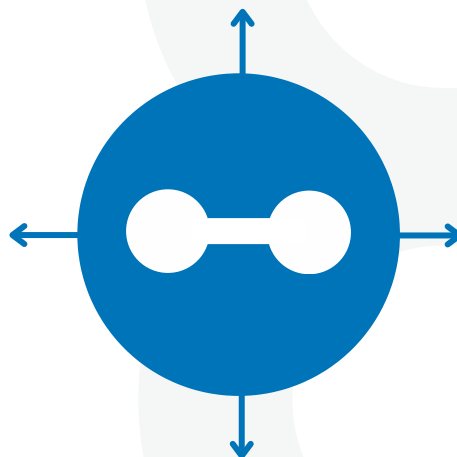

Hauling

HYDROGEN

Expertise and implementation of optimised logistics schemes

Connection and unloading
on site

Mobility, energy
transition, industry

Hauling

LPG

With mass measurement system and ATEX radio remote control

Bulk and packaged

By tank semi-trailer
and rigid truck

CHEMICALS

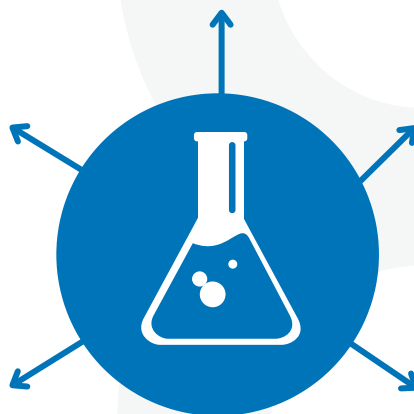

Single and multi-compartment, container ship

Inorganic chemicals
and solvents

Storage
tank hire

Bulk liquids
and powders,
packaged

Metered
distribution in
IBCs and tanks

HYDROCARBONS

Distribution of fuel and fuel oil at service stations on industrial sites and to private customers

Bunkering of ships

Special fuels

Tank semi-trailer and rigid truck

BITUMEN

Sea freight exports

Heat-insulated tank

Construction sites
and/or bitumen plants

Release into the atmosphere from the ground, thereby preventing both the risk of
splashing when the tank dome is opened and falls due to working at height

ENVIRONMENT AND CONSTRUCTION

Building rubble skip,
Ampliroll, concrete mixer

Multiloader trailer with or
without grapple + skip
loader truck

Transport of construction
products and waste in
tippers and flatbeds

Evacuation and transport
of ship sludge and slop
by tanker

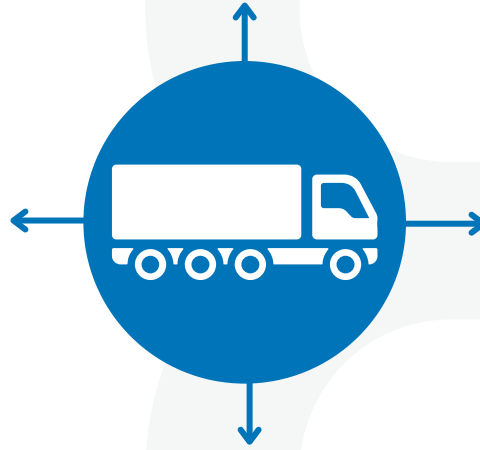

Flatbed truck with crane

PACKAGED GOODS

FIBC : asbestos, explosives and other products

Hazardous and non-hazardous waste
(trackdéchets tool)

General cargo and long goods, palletised or not

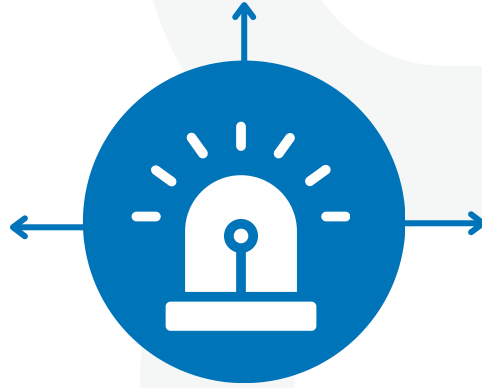

Tarpaulin-covered transport (rigid truck or semi-trailer, standard, tailboard, truck-mounted forklifts), standard flatbed

OVERSIZE LOADS

1st, 2nd and 3rd category transport

Transport of site equipment, bungalows, crane arms, petroleum product tanks, etc.

Standard flatbeds, extendable flatbeds, extendable lowbed trailers, heavy machinery transport trucks

Logistics solutions and intermodal transport

EQUIPMENT HIRE

Specific designs: steel or stainless steel tanks, customised coatings at the customer's request compatible with transported products

Adapted intermodal chassis with ergonomic access

Tank containers (gas)
from 27.5 bar to 140 bar

Tank containers : stainless steel and special steels, low and high pressure from 4 bar to 140 bar

Semi-trailer
hire

Mobile tank

INTERMODAL TRANSPORT

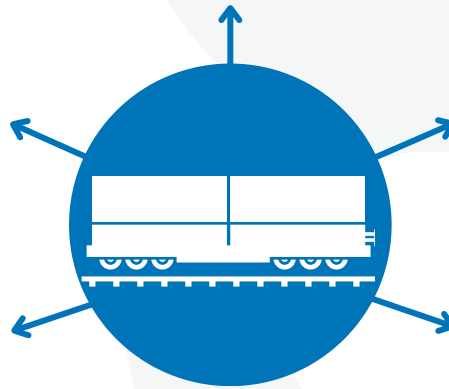

Environmentally-friendly logistics solutions

Solutions adapted
to customer needs

200 ITUs and 140 chassis

Door-to-door services with
no transloading

Operation of a
multimodal terminal

STORAGE AND WAREHOUSING

Storage services : ADR and non-ADR products

On-site industrial services

Supply
of teams

Cracking station

Hydrocarbon
depot

Loading of powdered products using a Dino with integrated dust collector and high-capacity hopper

| Other services

HEATING STATION

Electric heating station

Steam heating station

Hot water
heating station

2 computer-controlled and regulated heating stations : Dunkirk and Fos-sur-Mer

WASHING

External washing of units with rollers

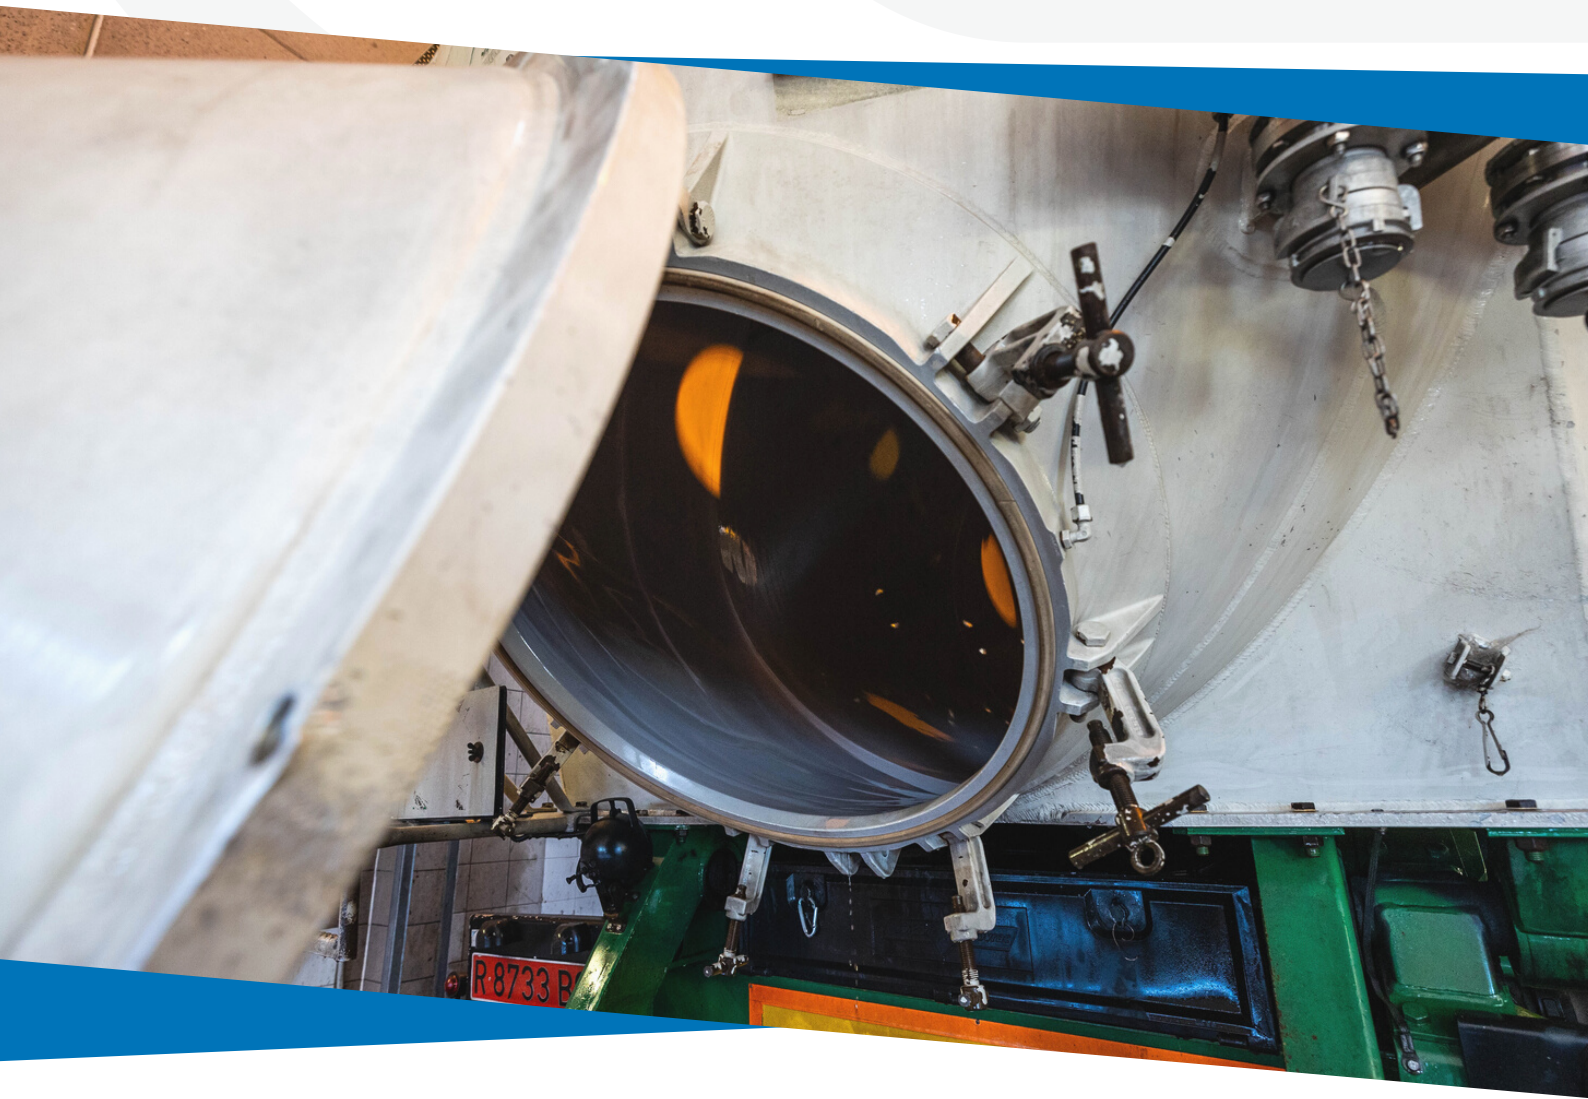

Internal washing of
chemical and food tanks

Reheating and regulatory
testing

Washing and storage
of IBCs

Cleaning of
industrial sites

2 stations : Dunkirk and Mulhouse

MAINTENANCE

ADR inspection, periodic tank testing centre

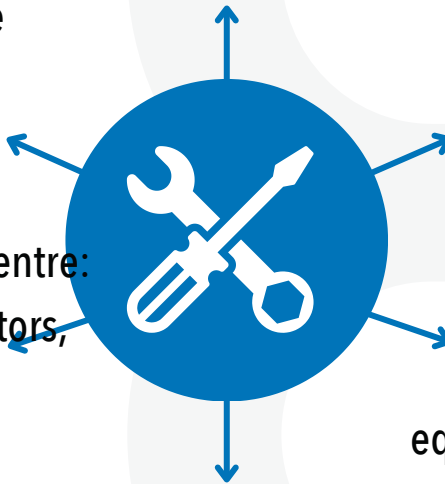

Preparation and performance
of roadworthiness tests

Vehicle accessory assembly centre:
pumps, compressors, generators,
customer OBCs, etc.

Routine maintenance
or specific interventions
by specialist
technicians

Metrology : inspection
and repair of measuring
equipment for liquids other
than water

Maintenance of running gear and distribution unit for customer cryogenic tanks

VEHICLE MAINTENANCE

Preparation and performance of roadworthiness tests

ADR inspection, periodic tank testing centre

Maintenance of running gear and distribution unit for our tanks

Metrology : inspection and repair of measuring equipment for liquids other than water

OUR SAFETY-TRAINED EXPERTS

- | A team of tutors for each business line
- | Delegated training instructors
- | A group QHSE manager
- | Subsidiary QHSE managers
- | 12 safety advisers

- | ADR-trained drivers with specialised training depending on the material transported

- | Regular safety audits for our drivers

CSR AND CERTIFICATIONS

ISO 9001 : 2015 group certification for all transport subsidiaries

10 SQAS-assessed subsidiaries

Recycling and limiting waste

Employee participation through monthly consumption monitoring

Investment in an engine fleet using alternative energy sources to diesel

Selection of suppliers demonstrating environmentally-friendly practices in their supply of goods and services

Reduction of carbon and fine particle emissions: investment in the most technologically advanced equipment and drivers trained in energy-efficient driving

Raising awareness of good environmental practices among our permanent and workshop staff

Groupe Brun

Boasting more than a century of experience, the Brun Group specialises in the transport of dangerous goods and logistics solutions for speciality products.

Over the years, the Group has successfully adapted to market changes while preserving the family values that underpin its strength.

Composed of a team of experts, our design office allows us to create innovative and custom solutions to meet our customer's needs while ensuring maximum safety and high-quality service.

We are aware of the complexity of the sector and the ecological issues involved. As such, we are reducing our environmental impact by using more responsible fuels and adopting cutting-edge technologies to improve our energy efficiency.

Our teams are trained on a daily basis to uphold the highest standards of quality and safety.

Thanks to our unwavering commitment and loyalty to our customers, we have earned a leading position in the industry.
